

AHMED MUAZ ATİK

Software Engineer

ABOUT ME

I'm a multidisciplinary developer who thrives at the intersection of software engineering and digital creativity. With a strong ethical foundation and a passion for building meaningful things, I bring a sense of clarity and precision to every project. Whether it's embedded systems or 3D motion design, I enjoy turning complex ideas into impactful experiences. Collaboration, constant learning, and genuine curiosity are my core strengths.

EDUCATION HISTORY

Computer Engineering BSc

Institution: Fatih Sultan Mehmet Vakıf University

Year of Graduation: 2025

Education Type: English / Full Scholarship

- Civilization and Thinking Club
- R&D Contributor, Kasva Team – Teknofest Efficiency Challenge (ITU)

Private STEM Highschool

Institution: Şefik Cüce Schools

Year of Graduation: 2021

- Top Student

TECHNICAL SKILLS

Languages & Frameworks

C#, Java, React, JavaScript, HTML/CSS, Tailwind

Systems & Tools

Azure, Linux, MySQL, Git

Creative Software

Adobe Suite, Figma, Blender

INTERESTS

- Web-based software development (React, Vite)
- Artificial intelligence and computer vision applications
- User interface and user experience (UI / UX)

TEST SCORES

- **ALES (Quantitative):** 82,39920 (2026)
- **YDS (English Proficiency Exam):** 73,75000 (2026)

LANGUAGE

- **Turkish** — Native
- **English** — Upper Intermediate

SELECTED PROJECTS

Interactive 3D Portfolio Website (Creative + Technical)

A highly personalized portfolio site built using React.js, Three.js, and Spline. Showcases my creative and technical projects in a dynamic 3D environment.

- Integrated real-time 3D elements
- UI/UX focused, showcasing both technical and design proficiency

 [View Live](#)

Fine-Grained Vehicle Classification (Deep Learning Project)

A research-driven project focusing on fine-grained car classification using CNN architectures (VGG-19, ResNet) and deep metric learning (Triplet Loss).

- Built custom PyTorch dataloaders for Stanford Cars dataset
- Trained and evaluated models using embedding visualizations, validation accuracy, and loss metrics
- Integrated web-based k-NN classifier for real-time demo

 *Final-year project – supervised, highly technical*

 [View Project](#)

Chest X-Ray Classification (Medical AI)

Deep learning model for detecting abnormalities in chest X-ray images using CNNs and image processing techniques.

- Binary/multi-class classification of lung disease patterns
- Transfer learning with pretrained architectures
- Healthcare AI application with real-world impact

 [View Project](#)

STM32 Embedded System (Hardware-Level Project)

Designed and implemented a microcontroller-based system using STM32.

- Controlled servo angles via potentiometer
- Managed a 7-segment display using push buttons
- Focused on GPIO, PWM, and debouncing logic

 [View Project](#)

Promise12 – Microservice Benchmarking Tool (Performance Engineering)

JavaScript benchmarking tool for measuring Promise-based asynchronous performance under various concurrency loads.

- Sub-12ms granularity execution time tracking
- Analyzes event loop bottlenecks and concurrent execution patterns
- CLI-based benchmark with JSON report generation

EXPERIENCE & VOLUNTEERING

Web Developer & Graphic Designer

Freelance

2021 – Present

I develop websites and digital content.

Software Engineer Intern

Mavi Publishing

June 2025 – August 2025

Contributed to interface and content development processes in web projects.

Multidisciplinary Editor

ABY Group

February 2024 – August 2025

Managed the social media content of 14 brands and participated in end-to-end creative processes, from studio setup to video production, together with the team.

Social Aid Volunteer

Independent Organization

June 2021 – August 2025

Provided basic humanitarian assistance to homeless individuals.

Software Engineer Intern

IYMER Group

June 2024 – August 2024

Contributed to the development of company websites software infrastructure.

Volunteer Software Engineer Intern

Parkera

November 2023 – January 2024

Participated in interface development and data processing processes.

Volunteer Instructor

Esenler Municipality

September 2022 – June 2023

Provided voluntary guidance and values-based education to high school students.

Private Tutor

Private Institution

November 2021 – June 2023

Provided one-on-one English tutoring to children aged 10–15.
